

ARCHITECTURAL SPACES

Homework Due: Tuesday, March 23rd

In your sketchbook, do 5 half-page drawings of architectural spaces. Use pencil to draw either the inside or outside of buildings. Spend about 2 hours on each drawing.

Draw the spaces using sighting techniques, and show an illusion of depth by pulling from your knowledge of linear perspective. Avoid using the mechanical drawing methods of linear perspective, simply use sighting instead.

Label the back of each page with the title of this assignment and the time you spent drawing each composition.
